P13 Batch upgrade 2

4 Note:

First:

If upgrade failed, please make sure the upgrade file is correct and the device has the correct software version.

Second:

If device software has encountered bug and do not work correct. You can use 3800 port to login device, but you can't get other information.

Third:

If you want to use batch upgrade function, please make sure the device you select can use the same upgrade file.
